

## How to Properly Fold Dress Blue Bellbottom Trousers

*(NOTE: This method does not apply to the working utilities trousers, the male's working trousers or to the Female dress pants.)*

Pull the trousers inside-out. Lay the trousers out on a flat firm surface with the front (thirteen button flap) facing down.

Fold the left leg over the right, smooth out the material and ensure that creases are properly aligned.

Find the middle of the pant leg and mark it by placing a pen at the middle point.

Then neatly fold the waist down to the pen.

Next, fold the trouser legs UP to the pen. REMOVE THE PEN.

Neatly bring top down over the bottom portion. Ensure that the creases are properly aligned to avoid double creases.

Store your trousers with the jumper to keep them clean and perfectly creased and ready for inspection.
